ML 101

Level Up Your Skills with Free Machine Learning Certification Course

Course Fee FREE

Course Overview

The Machine Learning free online course is designed as an intuitive introduction to Machine Learning fundamentals. This course aims twofold: to build a strong foundation of core machine learning concepts and to allow learners to get hands-on experience in Exploratory Data Analysis and Feature Engineering.

The course gives you a complete overview of Machine Learning concepts. This uniquely designed course will equip the learners with the necessary knowledge before they begin their Data Science journey.

Curriculum

☑ Exploring Data - An Introductory Module

- What is Data Analysis?
- Skills for Data Analysis
- Introduction to Excel
- Introduction to DBMS
- Introduction to SQL
- SQL Aggregate Functions

☑ Statistics for Machine Leaning

- Introduction to Statistics
- Mean
- Median
- Mode

☑ Python Basics - A Beginner's Guide

- Introduction to Python
- Python for Data Science
- Python Variable and Data Types
- Python Loops
- List
- Body Mass Index
- Pizza Bill Calculator

☑ Fundamentals of Machine Learning

- Intro to ML - Part 1
- Intro to ML - Part 2
